

Telecom Room

Designed for Performance

Allen Tel Products, Inc. offers a complete solution of high performance cross connectivity communication products. Our products provide an interoperable, reliable connection and quality system performance for high-speed multimedia applications.

Channel Performance Testing

Products are regularly tested in-house and at independent test labs to exceed TIA/EIA Cat 5e, Cat 6 and Cat 6A channel performance with leading cable manufacturers.

Product Features:

- Fiber Optic Wall and Rack Mount Enclosures and Adapter Panels
- Patch Panels with universal wiring for either T568A or T568B
- Unloaded Patch Panels for multimedia networking modules and system flexibility
- Cable Management Panels and Mounting Brackets
- Category 5E and Category 6 110 Cross Connect products
- Distributing Rings
- Backboards
- Network Media Box

Telecom Room products are designed for ease of installation and performance by supporting the layout of structured cabling systems.
