XX Colors: WH-White; YL-Yellow; BU-Blue; GY-Grey; GN-Green; RD-Red; BK-Black; OR-Orange; P-Purple

These 28 AWG cords (approx. 0.14 diameter) offer smaller cable fill and bend-radius flexibility.

Some limitations apply: 28 AWG stranded conductors provide standards-compliant performance when up to 20 feet of patch cord is used in a standard 295-foot (90 meter) channel.

Custom lengths and colors are available, including Cat 6A 28AWG SLIM.
